

# 8416 Series

## Regulated Distribution Panels

The Dielectric Model 8416 regulated Distribution Panels are designed to allow both visual monitoring of the air flow into each cable as well as the monitoring of the total air usage of the panel via an 800 Series Flow Transducer. With that addition of the 800 Series Flow Transducer the total panel flow can be monitored electronically as well as visually at the central office. The panel is equipped with a locking regulator as a 0-15 PSIG pressure gauge to display the system working pressure. Pressure transducers can be factory installed to provide remote pressure monitoring.

### FEATURES

- Non-Powered Summary Flow Transducer Position for use with 800 Series Flow Transducers.
- 800 Series Flow Transducer has 100-Step resistance output and is visually readable.
- Available with or without pressure transducer.
- Industry standard 10 Bank Flow Rater.

### ORDERING INFORMATION

PART NO.	DESCRIPTION
F8416	Regulated Distribution Panel
F8416-P	Regulated Distribution Panel with Pressure Transducer

800 Series Flow Transducers must be ordered separately. Please choose from:

PART NO.	DESCRIPTION
FA801	801 Flow Transducer 0-10 SCFH
FA802	802 Flow Transducer 0-20 SCFH
FA803	803 Flow Transducer 0-50 SCFH
FA805	805 Flow Transducer 0-100 SCFH
FA806	806 Flow Transducer 0-200 SCFH
